

LKM vezetékcsatornák Megbízható védelem a vezetékek és kábelek számára

Optimalizált élvédő gyűrűkkel

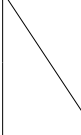

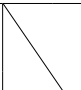

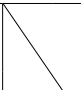

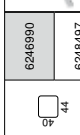

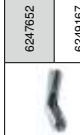

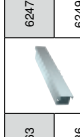

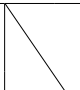

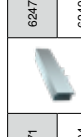

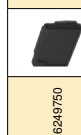

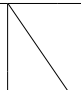

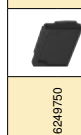

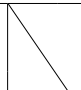

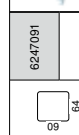

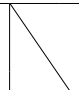

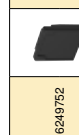

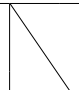

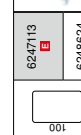

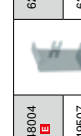

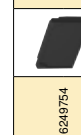

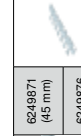

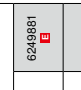

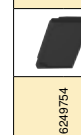

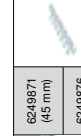

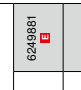

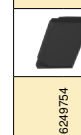

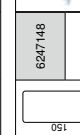

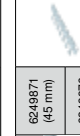

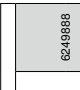

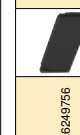

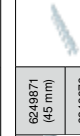

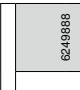

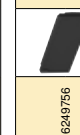

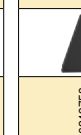

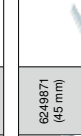

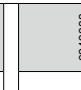

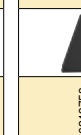

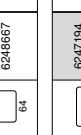

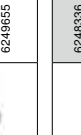

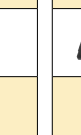

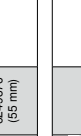

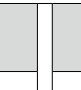

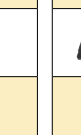

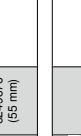

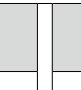

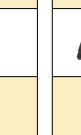

Az optimalizált élvédő gyűrűk könnyen szerelhetők, akár utólag is, akkor is ha a csatornákat már felszerelték a falra, vagy akár már bekábelezték.

- 10 különböző csatornaméretben és 2 felületkezeléssel (FS szalaghorganyzott illetve FSK szalaghorganyzott hófehér porszórt) kapható.
- A fedél és az alsó rész, valamint a csatornadarabok közötti potenciálkiegyenlítés további összekötők használata nélkül garantált.
- Különböző tartozékok teszik lehetővé a falra és a mennyezetre történő szerelést.
- Műanyag élvédő gyűrűk és végelemek segítségével egyszerű az utólagos beépítés.
- Az LKM 20030 és 60100 típusok alkalmasak a DIN 4102-12. szerinti tűzálló kábelrendszerekhez.
